

What have we been learning in Early Years this week?

11th - 15th February 2019

The children have brought home some homework this week. They have got specific sounds/ words to learn at home over the half term. You can do this in a fun way by doing 'speedy words' or hide them around the house and see how many they can find and read!

After the children showed an interest in boats last week, this week in the art area we have created our own boats. We then tested whether they could float or not in the water tray. This led to some fantastic discussions and problem solving.

Read, Write, Inc/ Literacy

We would appreciate it if you could practise these sounds with your children at home:

g, c, k, u, b, f, e, l, h, sh, r, v, y, w, x, z

The children have done a great job at writing lists of things they love today

The children have loved making cards this week. They have been writing cards or drawing pictures and putting them in envelopes for their friends or family. Lots of children understand that we need to say who our picture is for by writing 'to...'. Some children could even find this word in our writing area!

Mathematics

This week we have been learning about 3D shapes. The children are becoming more confident with recognising the 3D shapes such as cube, cuboid, cone, cylinder, and pyramid. They have also been comparing and sorting 2D and 3D shapes.

Next week...

Literacy	Mathematics	Provision
After half term the children will come in to see a big surprise in school, our writing will be based around this.	After half term we will be recapping addition with a focus on recognising teen numbers.	After half term our topic is 'To Infinity and Beyond'. It will be based all around space, we might even have a rocket crash land in school!
