

Science Week 2022 @ Bird's Bush

11-20 March
**British
Science
Week
2022**

Dear parents,

On the week of the **14th March**, Bird's Bush will be celebrating **Science and Technology Week** throughout the school. Each class will be working to create a STEM (Science, Technology, Engineering and Maths) project in school based on the subject of 'Growth', this year's British Science Week theme.

To celebrate this exciting week we are holding our own **STEM fair!** We are inviting children to **create their own STEM project at home which demonstrates their understanding of 'Growth'**. For example, children could look at plant growth, population growth, how animals or humans grow ... the possibilities are endless! We would be very grateful if you could support your children in their project, discussing the scientific theory behind their project.

If children wish to enter, they **need to bring their project**, along with an explanation of the science behind their work, to class on **Monday 14th March**.

Each project will be celebrated, however one winner will be chosen from each class and will receive a certificate. These winners will be entered into our STEM fair where our panel of judges will be invited to select a winner from each Key Stage on **Wednesday 16th March**. If your child's project is entered into our STEM fair, one family member will be invited to the fair to celebrate your child's entry.

In addition to our STEM projects, we would love for you to email in a **'Science Selfie'** of the children, to the email address, caught doing something scientific (Could they be observing the nature in their garden? Taking part in identifying changes in materials when cooking? Exploring slime? Exploring in a museum?) Each selfie entered will be added to our school display and the best entry will receive a prize.

I hope you are as excited about our Science and Technology Week as we are!

Thank you for your continued support.

Mrs Gould
(Science Subject Lead)

Watch our Assembly where Mrs Gould introduced Science week ideals to the children.
